MARCH 2026

Issue 12

*Driving innovation,
Celebrating impact*

A Message From Director

Dear Team,

"FY 2025-26 is our best year in numbers — 54 lakh metric tonnes processed, 17+ plants running simultaneously, and meaningful improvement in RDF quality driven by higher shredding throughput. The more we shred, the more we dispose — and our teams proved that this year

Nagpur, Guwahati, Kodungiyur, BSF Kochi, and the entire AP Cluster have performed well. I am proud of all these teams. At the same time, Makarpura, Puducherry, and Trichy have not yet reached the level we expect. Kozhikode and Perungudi are yet to begin — FY27 is their year to build it right from Day 1.

We are launching four new business verticals this year. The foundation is strong. Now every team must rise to the next level. I believe in all of you.

Best Regards,

Mr.B.Dharmaraj

Managing Director

Company Performance Overview

We are delighted to share that our company has achieved a **81% Year-on-Year Growth**, reflecting significant improvements in efficiency and overall performance.

This milestone highlights the dedication of our team and our continued commitment to driving excellence.

Key Metric: Efficiency Improvement

81%

Year on Year Growth

Financial Year (2025-26)

Congratulations, Team Zigma!

Our greatest year yet — and you made it happen

17+ Plants Running

10-Year Growth Journey

Key Milestones

30.4%

of everything Zigma has ever processed in 10 years — achieved in FY26 alone

3.4× more

than our entire first 5 years combined (FY2016-FY2020)

Nagpur & Kodungiyur

delivered stronger RDF disposal performance this year

Waste Management Software

implemented in Blue Planet Biofuel Division this year

BSF Brammapuram — Kochi

Dried larve processing **significantly improved** with new sales channels created. Frass processing also **improved substantially** with new dedicated sales channels established. BSF Kochi is a fully functioning new revenue vertical — built from the ground up by the team there.

RDF Quality — Strategic Win

SHREDDED ↑

Output significantly increased — better quality, more volume disposed to cement factories.

UNSHREDDED ↓

Volumes reduced. Every tonne we shred unlocks more disposal channels.

The more we shred — the more we can dispose.

The most impactful operational lever at every site.

Site Performance — FY 2025-26

✓ PERFORMED WELL

Nagpur
Guwahati
Kodungiyur — Chennai
BSF Brammapuram — Kochi

✓ PERFORMED WELL

AP Cluster:
Donthali
Nellore
Tirupathi
Chittoor
Visakhapatnam

↑ NEED TO STEP UP

Makarpura
Puducherry
Trichy
*All three have the potential.
Expectation for FY27 is
significantly higher.*

⦿ STARTING FY27

Kozhikode
Perungudi — Chennai
*Build the right habits, systems &
discipline from Day 1.*

FY 2026-27 · 4 New Business Verticals — This Is What We Build Next

01

Machine Sales
Trommel, Conveyor, OBMS,
DSS — 100% Zigma designed
& fabricated

02

Machine Rental
Equipment rental to external
clients — recurring revenue
model

03

Fresh Waste Processing
Processing contracts for fresh
municipal solid waste

04

Software Sales
Waste management software
— proven in-house, now
commercialising

Departmental Highlights

HR DEPARTMENT

Key Achievements

- ★ In the month of March, a total of 313 members (Fitters, Welders, and Helpers) joined. Out of these, 25 members were in staff categories
- ★ Holi celebrations were conducted to foster team bonding and promote a vibrant, inclusive workplace culture across teams.
- ★ Women's Day was celebrated by recognizing the contributions and achievements of women employees, reinforcing a culture of equality and respect.

Performance Metrics

85%

against commitment

FINANCE DEPARTMENT

Key Achievements

- ★ Initiated FY2026 financial closure as per timeline (April 2026 target).
- ★ Maintained on-schedule progress of closure activities.
- ★ Coordinated multi-location data collection efficiently.
- ★ Ensured early-stage data validation and recording.
- ★ Enabled streamlined financial data consolidation.

EARTHMOVERS DEPARTMENT

5,48,178 MT

Total Inward achieved

1,04,420 hrs

Total Machine Running Hours

192

Overall Productivity

7,39,832 L

Total Diesel Purchased

7,00,342 L

EM Diesel Consumed

29,111 L

DG Diesel Consumed

Best Performing Sites – March

- ☆ Guwahati – Best EM Effective Site for March
- ☆ Nellore – Donthali – Highest MSW productivity (137.08 TPH)
- ☆ KDG – Package 4 – Best Inert productivity (119.95 TPH)
- ☆ Guwahati – Best RDF productivity (49.82 TPH)

Productivity Summary Best Sites

- ☆ MSW Average: 102.03 TPH Nellore-Donthali
- ☆ Inert Average: 92.73 TPH KDG – Package 4
- ☆ RDF Average: 24.94 TPH Guwahati – 49.82 TPH

Key Achievements

- ☆ Guwahati identified as Best EM Effective Site for March
- ☆ Strong performance across KDG cluster, NMC Project-2, and Nellore sites
- ☆ Effective fuel monitoring and cost control maintained
- ☆ High machine utilization achieved
- ☆ Balanced performance across MSW, Inert, and RDF operations

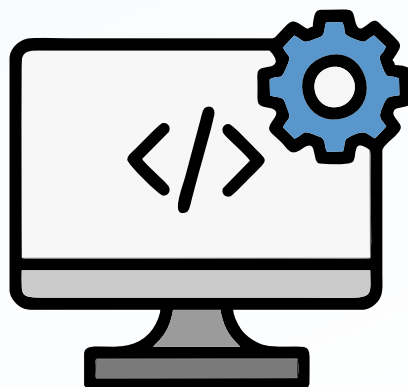

Key Achievements

Software:-

- ✧ The Kozhikode WB portal has been successfully integrated.
- ✧ The Rayadurgam Phase 3 portal has been successfully integrated.
- ✧ The PMS option has been enabled in the Payroll system.

Hardware:-

- ✧ Fixed latitude and longitude for all WB cameras to ensure accurate camera location tracking.
- ✧ Completed IT installation at Kozhikode.
- ✧ Completed IT installation at Makarpura Plant-2.
- ✧ Successfully backed up all Guwahati and Anandhapur WB CCTV recordings and submitted them to the municipality for billing.
- ✧ Onboarded 10+ new staff members at Head Office with timely hardware provisioning.
- ✧ Maintained 100% uptime for WB cameras through effective maintenance.
- ✧ Maintained 99% uptime for Plant NVR systems.
- ✧ Successfully closed all 148 tickets with no pending issues.

SAFETY DEPARTMENT

In March 2026, our teams continued to champion safety across all Bio-Mining sites and the corporate office. During the month, one Lost Time Injury (LTI) was reported. Immediate Corrective and Preventive Actions (CAPA) were implemented, turning this incident into an opportunity for learning and improvement. Every team member's vigilance, care, and collaboration contribute to making our workplace safer each day—because safety is a responsibility we share, together.

Safety Spotlight – March 2026

- ✧ Safety Week celebrated across all sites, reinforcing engagement and awareness.
- ✧ Leadership in Safety Training conducted across all sites.
- ✧ Safety Committee meetings successfully conducted.
- ✧ Safety compliance for the new Kozhikode site successfully completed.
- ✧ Excellent engagement in UAUC Reporting and Closing Training across all sites.
- ✧ Fire & Evacuation mock drill conducted at the office.

This spotlight underscores our collective commitment to learning, improving, and keeping everyone safe every day.

Safety Tip of the Month – Prevent Incidents Before They Happen

- ✧ Follow HIRA and Standard Operating Procedures (SOPs)
- ✧ Implement Engineering Controls
- ✧ Report Near-Misses and Unsafe Conditions
- ✧ Use Appropriate Personal Protective Equipment (PPE)
- ✧ Stay Vigilant – Identify hazards early and act to prevent accidents

Key Message

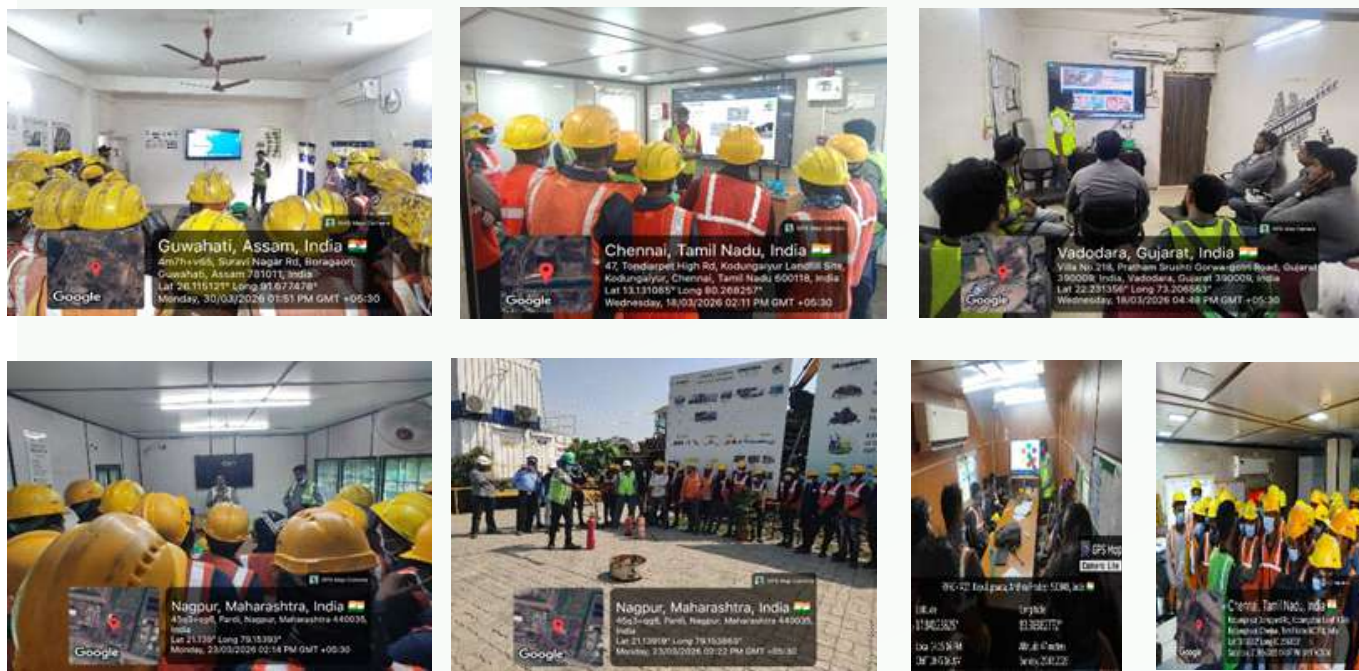

- ✧ Small, responsible actions every day make a big difference. Together, we ensure everyone goes home safe.
- ✧ A few minutes of planning and responsible behaviour can prevent accidents and save lives.

*Our goal remains unchanged: Everyone home safe, every day.
Stay alert. Stay responsible. Stay safe.*

Corporate Office: Mock drill, Safety Committee meeting

Safety Monthly Training

National Safety week celebrations

Glimpses of banner display, badge distribution, flag hoisting, and safety pledge

Online Safety Quiz Competition conducted, 2 participants selected from 234 responses.

Carbon Mitigation by Processing Legacy Waste

Zigma has mitigated **3,71,329.84** tons (**0.37 million MT**) of CO₂ emissions by processing **5,36,216.38 MT** (**5.82 million MT**) of legacy waste March 2026.

Carbon Sequestered by

3,72,466 acres
of US forests
in one year

GHG Emissions avoided by

111 wind turbines
running
for a year

Carbon Mitigation By Using RDF as alternative Fuel In Cement Plants

Zigma has saved **11,917.81 tons** (**0.01 million MT**) of CO₂ emissions by dispatching **70,939.32 MT** (**0.07 million MT**) of RDF during March 2026.

Carbon Sequestered by

11,954 acres
of US forests
in one year

GHG Emissions avoided by

3.6 wind turbines
running
for a year

Induction Training Program

The induction training program for new joiners was successfully conducted on March. The session was designed to onboard employees into the organization's culture, policies, and operational processes, enabling a smooth transition and faster alignment with organizational objectives.

Holi Celebration

Holi was celebrated with vibrant activities, bringing employees together to embrace the spirit of unity and positivity. The celebration strengthened team bonding and fostered a more collaborative and energetic workplace culture.

Women's Day Celebration

Women's Day was celebrated by recognizing and appreciating the valuable contributions of women employees across the organization. The initiative reinforced our commitment to inclusivity, empowerment, and a progressive workplace culture.

Ramzan Gifts Distribution

Ramzan was celebrated by distributing curated gift hampers to employees, recognizing their contributions and honoring the spirit of the festival. The initiative strengthened employee engagement and reinforced an inclusive, people-centric workplace culture.

Phase II Biomining Launch at Perungudi: Accelerating Chennai's Waste-to-Resource Transformation

We are grateful to the Hon'ble Minister for Municipal Administration, Urban and Water Supply, Tamil Nadu, Thiru K. N. Nehru, for flagging off Phase II of the biomining project at the Perungudi Dumpsite, Chennai.

This phase will focus on the scientific removal and processing of 5.5 lakh metric tonnes (550,000 tonnes) of legacy waste, further advancing large-scale remediation at one of Chennai's key dumpsites. The initiative will contribute to land reclamation, improved environmental outcomes, and the strengthening of sustainable urban waste management systems.

Zigma remains committed to advancing scientific biomining, legacy waste remediation, resource recovery, and landfill reclamation, enabling circular economy-driven waste management solutions and supporting the transition towards sustainable urban environmental systems.

Advancing Circular Materials: SLM-Based Paver Research at NIT Trichy

Zigma is honoured to contribute to the landfill mining operations at the Ariyamangalam legacy dumpsite, where Soil-Like Material (SLM) recovered through the process is now being studied by researchers at the National Institute of Technology, Tiruchirappalli (NIT-T) for the development of eco-friendly paver blocks.

The study examines the potential of SLM, which forms a significant portion of legacy waste, as a partial replacement for conventional fine aggregates in paver blocks. Initial findings indicate promising results in terms of strength and performance.

It is encouraging to see materials recovered through scientific landfill mining being explored for productive reuse, highlighting the growing potential of legacy waste to support resource recovery and circular material applications in sustainable infrastructure.

HOME / NEWS / CITIES / TIRUCHIRAPPALLI

NIT-T researchers make paver bricks from Ariyamangalam legacy waste

Published - March 06, 2026 08:18 pm IST - TIRUCHI

THE HINDU BUREAU

Researchers at the National Institute of Technology, Tiruchi (NIT-T) have manufactured eco-friendly paver blocks using legacy waste extracted from the Ariyamangalam dump.

According to an official release on Friday, NIT-T's civil engineering team utilised Soil-Like Material (SLM), which constitutes about 53% of the legacy waste, as a component of its blocks. Historically, SLM has been dumped into low-lying areas due to limited reuse options.

The team has developed SLiM Blocks, paver blocks made using SLM as a partial replacement for conventional fine aggregates. Studies suggest that replacing 15% of fine aggregate with SLM yields optimal results in terms of strength and performance.

Tests are on to assess durability and facilitate large-scale production. The project is led by S.T. Ramesh, professor, Department of Civil Engineering, with G. Saravanan (Prime Minister's Research Fellow) and Devavarapu Chandu (M.Tech scholar). The initiative is carried out in partnership with the Tiruchi City Corporation and Zigma Global Environ Solutions.

Perungudi Transformation: From Legacy Dumpsite to Circular Resource Hub

For nearly five decades, the Perungudi dumpsite in Chennai, spread across over 200 acres, stood as one of the city's largest garbage mountains, posing significant environmental and public health challenges.

Today, the site is undergoing transformation through scientific landfill mining and legacy waste remediation, enabling the recovery of materials and gradual land reclamation. Materials recovered during the process are now being explored for new applications, including construction materials and furniture, highlighting the potential of legacy waste to support circular resource use.

At Perungudi, Zigma is carrying out landfill mining operations as part of the broader effort to clear the dumpsite and enable responsible waste processing and land recovery.

Zigma remains committed to advancing scientific landfill mining, legacy waste remediation, resource recovery, and land reclamation, supporting sustainable urban waste management solutions.

Read the full article here:

<https://theprint.in/ground-reports/chennai-is-starting-to-clear-the-perungudi-garbage-mountain-and-make-furniture-from-it/2875805/>

Chennai is starting to clear the Perungudi garbage mountain. And make furniture from it

In the immediate vicinity of Perungudi, the reclamation has already triggered a fresh wave of construction. A row of shopping outlets is coming up on one side.

The final stretch of Kartik's daily commute to his family workshop in Perungudi is an obstacle course. He must ride his motorcycle while holding his breath. He will do anything to prevent the sensory assault that rises from the 50-year old garbage mountain spread over 200 acres in southern Chennai.

"While crossing the dumpyard, the smell is the biggest concern from the very beginning. As the day passes, the evening time, it gets more intense. If you travel, you have to shut your mouth...and it is very difficult," said Kartik.

Perungudi landfill, one of Chennai's two burial grounds for solid municipal waste, has been in the headlines lately for more than just its foul stench. The Greater Chennai Corporation is reclaiming this land, or part of it, by removing the heaps of trash that have accumulated here for decades...[Read more](#)

March 2026 - Award Ceremony

Blood Donation Support

We extend our sincere appreciation to Mr. Dhanaprakash R J (Executive – Accounts) and Mr. Ramesh Muralidharan S (IT Support & Training Executive – Head Office) for demonstrating exceptional social responsibility through their voluntary blood donations in support of critical medical needs.

Their proactive approach, willingness to step forward, and commitment beyond professional boundaries reflect a strong culture of empathy, accountability, and inclusiveness. Such actions reinforce the organization's core values and establish a benchmark for responsible citizenship within the workplace, strengthening both internal teams and the broader community.
