MAY 2026

“Celebrating People, Progress and Sustainability”

OUR THEME THIS MONTH

People

The hands and minds behind every milestone.

Progress

Driving operational excellence and innovation.

Sustainability

Transforming waste into a greener tomorrow.

1 MAY 2026 · INTERNATIONAL WORKERS' DAY

Celebrating the Hands Behind Every Milestone

Every tonne of legacy waste reclaimed, every RDF load dispatched and every dumpsite returned to the community is the work of **people**. On International Workers' Day, Zigma Blue Planet pauses to honour the operators, drivers, technicians, fitters, welders, weighbridge teams, plant crews and safety officers whose discipline and grit power our progress every single day.

Behind every milestone is a person who chose to show up and give their best — at the plants, on the sites, in the workshops and across our support desks. Their commitment, skill and quiet perseverance are what carry Zigma Blue Planet forward, day after day. To every colleague who powers our progress: **thank you.**

Operators

Drivers

Technicians

Safety Teams

Earthmover Crews

Plant Teams

Support Staff

“Machines move material — but it is people who move Zigma forward.”

Safety helmets on. Standards up.

Across 20+ project sites, our workforce keeps India's circular economy in motion — safely, scientifically and sustainably.

— MD'S DESK

Message from the Managing Director

B. Dharmaraj
Managing Director

MAY 2026

Dear Team,

May has been a month of **strong, steady performance**. Our teams handled **5.51 lakh MT** of municipal solid waste, dispatched **66,238 MT** of RDF to cement plants, and advanced biomining at flagship sites from Kozhikode to Perungudi — outcomes that reflect the dedication of people at every level of the organisation.

What gives me the most pride is not the tonnage alone, but **how** it was achieved — with teamwork, discipline and an unwavering commitment to safety. The successful World Bank ESG inspection at Kozhikode, the Fire NOC at Trichy and the continued strength of our safety culture remind us that operational excellence and responsibility go hand in hand.

Our digital backbone grew stronger this month — new weighbridge portals, ERP modules and dashboards now give our teams sharper, faster control of operations. This is the kind of quiet innovation that compounds into a decisive advantage over time.

Through it all, we kept sight of our larger purpose. The carbon we mitigated this month — equivalent to the sequestration of more than **3.75 lakh acres of forest** — is a measure of the role Zigma plays in **India's circular economy**. As we celebrate International Workers' Day, I want to thank every colleague whose effort makes this impact possible.

Let us carry this momentum forward — transforming waste into a cleaner, greener and better tomorrow.

Warm Regards,

B. Dharmaraj
Managing Director

— ZIGMA VOICES

Leadership Message

Dear Team,

As Zigma stands at the threshold of a new chapter — moving beyond legacy waste remediation into the dynamic space of **fresh waste management** — I find myself reflecting not just on processes and projects, but on people. On us.

Every milestone we have crossed so far has been built on the strength of individuals who stepped up when it mattered. And as we look ahead to bigger, more complex challenges, I believe the next leap forward won't come from new machinery or new contracts alone — it will come from the leadership each one of us is capable of showing, often without even realizing it.

There's a common belief that the world is divided into two kinds of people: leaders and followers. I'd like to challenge that a little. I recently watched a series called *"Made in India – The Titan Story,"* and I'd strongly recommend it to every one of you. Beyond being a fascinating business story, it's a story about trust, mentorship, and the courage to lead even when you don't hold the top title.

What struck me most was the chain of belief — how JRD Tata placed his trust in Xerxes Desai, and how Xerxes, in turn, placed that same trust in a young Akshay Chudasama (Akash Dixit in the show), handing him the responsibility of building a brand in a market dominated by smugglers and grey operators. What

followed was nothing short of remarkable — the creation of one of India's most respected watch brands, synonymous with quality and trust even today.

That chain didn't happen by accident. It happened because someone was willing to trust, and someone else was willing to rise to that trust — to take ownership, take risks, and take decisions without the safety net of certainty.

As we expand into fresh waste management, we need that same spirit at every level of Zigma. Whether you're managing a site, negotiating with a ULB official, drafting a tender response, or troubleshooting an operational issue on the ground — you are not just executing a task. **You are an extension of this organization's leadership.** The decisions you take, the ownership you show, and the initiative you display are what will define our next chapter.

Yes, there will be failures along the way. That's inevitable, and that's alright. In fact, it's often the failures — not the successes — that teach us the most. What matters is that we don't let the fear of failure stop us from making decisions in the first place.

So, as we move forward, my hope is that every one of us finds the Xerxes and the Akash within ourselves — the willingness to trust, and the courage to be trusted with something bigger.

Here's to leading from wherever we stand.

Warm regards,

Nagesh Prabhu Chinivarth

Co-Founder

— DEPARTMENTAL HIGHLIGHTS

Human Resources

Building a people-first organisation — talent acquisition, capability development, engagement and well-being across every site and office.

★ PERFORMANCE METRIC

Employee Engagement Score

A strong indicator of motivation, connect and a positive workplace culture this May.

KEY HIGHLIGHTS

- ✓ Onboarded **15 new colleagues** across 9 locations with **100% induction** coverage.
- ✓ Achieved an **80% employee engagement score** — driven by sustained connect and recognition activities.
- ✓ Conducted **Soft Skill training** for Head Office and KDG sites.
- ✓ Celebrated **HR Day** and felicitated Operations & Functional teams under Rewards & Recognition.
- ✓ Maintained timely payroll, compliance and grievance redressal across all sites.
- ✓ Onboarded **373** across all sites — **59 skilled** and **314 unskilled**.

15

— DEPARTMENTAL HIGHLIGHTS

Earthmover Department

Strong operational performance across all projects in May — uninterrupted support to MSW handling, RDF operations, inert management and windrow processing.

5.51 Lakh MT

MSW handled across all sites

36,814

Transportation trips ·
14.97 t/trip avg

81.39 TPH

Overall MSW loading
productivity

6.18 Lakh MT

Windrow & material
handling · 87.41 TPH

KEY HIGHLIGHTS

- ✓ Processed **2.28 Lakh MT** of inert material at **96.23 TPH** average loading productivity.
- ✓ Supported RDF operations by handling **65,522 MT** across multiple plants.
- ✓ Sustained equipment availability and cost optimisation through efficient deployment.
- ✓ Uninterrupted plant support despite varying site conditions and challenges.

TOP PERFORMING SITES

- TPY – Puttur Ph-3** Best transportation — lowest operating PTC
- Nellore – Donthali** Highest MSW loading — **116.10 TPH**
- ATP – Anantapur** Best inert loading — **166.64 TPH**
- Visakhapatnam** Best overall material handling performance

Consistent May performance reflects the team's commitment to operational excellence, productivity enhancement and effective utilisation of assets across the organisation.

— DEPARTMENTAL HIGHLIGHTS

BSF Solution

Black Soldier Fly Larvae — turning organic waste into high-value protein for the animal feed industry, advancing our circular bioconversion model.

★ GROWING DEMAND

1T

1-Tonne Order for Dried BSF Larvae

We are continuously receiving advance orders for dried BSF larvae. Recently, an order for **1 ton of dried BSF larvae** was received — a clear signal of the growing demand and importance of **BSFL as an animal feed ingredient**.

WHY BSF MATTERS

- ✓ **Bioconversion at scale:** BSF larvae rapidly convert organic waste into protein-rich biomass.
- ✓ **Animal feed ingredient:** dried larvae are a sustainable, high-protein alternative to conventional feed.
- ✓ **Circular economy:** diverts organic waste from landfill and returns value to the food chain.
- ✓ **New revenue stream:** advance orders point to a scalable, demand-led business line.

Organic Waste

Feedstock in

BSF Larvae

Bioconversion

Dried Larvae

Animal feed

Waste today, protein tomorrow.

BSFL closes the loop — transforming organic waste into a valuable, in-demand feed ingredient.

— DEPARTMENTAL HIGHLIGHTS

IT Department

Weighbridge, Hardware & Software — strengthening the digital backbone across every project location.

99%

Plant NVR uptime maintained

99%

ERP live-stream uptime (Restreamer)

5

New weighbridge portals integrated

3

New ERP modules & dashboards delivered

WEIGHBRIDGE

- ✓ WB stamping completed & certificates received at **Rayadurgam, Athipattu & Donthali**.
- ✓ New weighbridge installed at **Rayadurgam**, resolving recurring load-cell slippage & weight fluctuation.
- ✓ Guntakal Ph-3 options enabled and tested successfully.
- ✓ **Makarpura WB-2** new software installed; all issues resolved.
- ✓ Four additional software options added at **Visakhapatnam** for Jindal's operational requirements.

IT HARDWARE

- ✓ IT infrastructure erected & set up at **Athipattu & Guntakal** sites.
- ✓ Timely IT equipment allocation enabled seamless onboarding of new joiners.
- ✓ All WB-related issues resolved within defined TAT.
- ✓ WB & BC-1 cameras added to Restreamer portal; Trichy admin trained, plant cameras installed.

IT SOFTWARE

- ✓ Weighbridge Portal developed & integrated for **Vizag, Donthali, Tirupati, Guntakal (Ph-3) & Athipattu**.
- ✓ **Output Quality Module** upgraded with mail-trigger functionality.
- ✓ **Earthmovers Module** deployed in the mobile application.
- ✓ New: **MPR Module, Tender Process Tracker & AP Cluster Ph-3 Dashboard**.

Across multiple project locations, the team delivered weighbridge stamping, software enhancements, new installations, user creation, upgrades and infrastructure improvements — keeping operations connected, monitored and data-driven.

— DEPARTMENTAL HIGHLIGHTS

Purchase Department

Reliable supply chain execution, smart reuse and resilient sourcing — even through a challenging fuel-supply environment.

250

Purchase Orders generated & followed up

150

Work Orders processed on time

60

New vendors onboarded for services

125

Motors serviced & reused — zero new purchase

KEY ACHIEVEMENTS

- ✓ **Athipet erection requirements** fully processed — all materials delivered on time through close follow-up.
- ✓ **Motor service streamlining:** ~125 motors serviced and reused, eliminating new purchases.
- ✓ Warehouse infrastructure renovation in progress — material-wise arrangement & optimisation.
- ✓ Active supply-chain follow-up on all 250 POs and 150 work orders.

CRISIS MANAGEMENT

Uninterrupted diesel supply secured

Despite the prevailing war situation and a diesel & lubricants crisis, the team organised an uninterrupted fuel supply — keeping every site operational without disruption.

MSDS verified at all stores

Store

Live asset stock visibility

Issue & Return

Inward, outward & repair tracked

Right material, right place, right time.

Live asset tracking and weekly reviews are turning the store into a proactive, compliance-ready function.

— DEPARTMENTAL HIGHLIGHTS

Safety Department

A continued commitment to safety excellence — proactive risk management, employee engagement and a culture that protects people, assets and the environment.

SAFETY SPOTLIGHT — MAY 2026

- ✓ Monthly **Machine Safety** training conducted across all sites.
- ✓ **“Healthy Psychosocial Working Environment”** training + wellness yoga at Head Office.
- ✓ Safety Committee meetings held to review performance & compliance.
- ✓ **Fire NOC** received for the Trichy site.
- ✓ **World Bank ESG inspection** successfully completed at Kozhikode.
- ✓ Incident Prevention training at Nagpur & WPE plants.
- ✓ Site ERTs responded to and extinguished summer fire incidents effectively.

SAFETY TIP — MACHINE SAFETY

- ✓ Ensure guards & safety devices are in place before operation.
- ✓ Follow **LOTO** before maintenance or repair.
- ✓ Never bypass interlocks or protective systems.
- ✓ Operate only if trained and authorised.

OUR GOAL REMAINS

TOTAL CO₂ EMISSIONS
MITIGATED

3,74,022

tonnes of CO₂ avoided in May 2026

3.75 L

acres of US forest carbon
sequestered in one year

~85

wind turbines running for
one full year*

01 · Carbon mitigation by processing legacy waste

3,62,894 Tons

CO₂ emissions mitigated · May

By processing 5,24,035 MT of legacy waste · 1 May – 31 May 2026

3,64,004 acres

of US forest CO₂ sequestered in one year

109 wind turbines

running for one full year*

02 · Carbon mitigation by using RDF as alternative fuel in cement plants

11,128 Tons

CO₂ emissions saved · May

By dispatching 66,238 MT of RDF · 1 May – 31 May 2026

11,162 acres

of US forest CO₂ sequestered in one year

3.3 wind turbines

running for one full year*

From waste to resource — closing the loop

Through scientific biomining and RDF co-processing, Zigma diverts legacy waste from dumpsites, recovers value, and keeps carbon out of the atmosphere — advancing India's circular economy, one site at a time.

*Wind-turbine equivalent derived from total CO₂ mitigated using standard EPA greenhouse-gas equivalency factors; shown for illustrative comparison. Source: Zigma GHG Mitigation Data, May 2026.

— MAY HIGHLIGHTS

A Month of Celebrations

Birthday celebrations — the joy that keeps Zigma a great place to work.

Celebrating our May birthdays 🎂

Warm wishes to every colleague who marked their special day this month — here's to joy, health and a wonderful year ahead.

Birthdays

— TAKE A BREAK

Fun & Games

Recharge your mind — a green quiz, a word hunt, surprising sustainability facts and a quick brain teaser.

GREEN QUIZ

- 1 What does **RDF** stand for in waste management?
a) Reusable Dry Fuel b) Refuse Derived Fuel c) Recycled Daily Feed
- 2 **Biomining** is mainly used to reclaim what?
a) Fresh produce b) Legacy waste dumpsites c) River sand
- 3 Which insect turns organic waste into protein in our **BSF** programme?
a) Honey Bee b) Black Soldier Fly c) Ladybird
- 4 What gas is most reduced when we divert waste from landfills?
a) Oxygen b) Methane c) Helium

WORD HUNT

Find these words: **WASTE · GREEN · RDF · BIOMINING · CARBON · RECYCLE**

W	A	S	T	E	M	S	M	V	N
L	D	W	G	C	N	M	P	Y	C
L	Y	N	Y	G	N	Y	Z	F	A
U	Q	A	Y	R	U	J	E	R	R
B	I	O	M	I	N	I	N	G	B
E	Z	Q	N	E	B	V	B	P	O
K	T	R	M	N	Q	A	P	V	N
V	Q	U	E	L	P	A	Z	B	P
U	V	V	J	C	H	N	P	X	W
R	D	F	T	E	Y	O	C	X	H

DID YOU KNOW?

-  Recycling one tonne of paper can save around **17 trees** and thousands of litres of water.
-  A single Black Soldier Fly larva can eat **twice its body weight** in organic waste each day.
-  RDF made from waste can **replace coal** in cement kilns — cutting fossil-fuel use and emissions.
-  In a circular economy, **nothing is waste** — every output becomes someone's input.

MINI SUDOKU

Fill the 4x4 grid so each row, column and 2x2 box contains **1-4**.
